

Presentation

My name is Julia. I will be thirteen on the fifth of November. I am in the seventh grade at School Hamburg.

I have an older brother named Dragos. Now he is at the high school. I really like playing badminton and basketball. I think I am pretty good at these two sports, but I haven't been to any competition so I can't tell you for sure. Playing tennis is a thing I've done for two years but I stopped because I didn't have enough time to continue. I'm having English lessons since I was young, so I know many things in English and that's why I've travelled to England, Plymouth two times with my brother and some of my classmates. I like studying biology and I wish to go at the Biology Olympiad. This year we learn anatomy. In my free time I go to an acting class and I will have my first performance in December. We will play "The Doctor In Spite Of Himself (Le médecin malgré lui)" by Molière.

I like searching information on the internet and talking with friends. I'm really into spending a lot of time at the computer playing games. If I'd have to choose between playing computer games and hanging with my friends, I would definitely choose my friends.

I like reading books and the last book I read was "Gone with the Wind". I like all sorts of books, but I prefer to choose what books I read. If I like the topic of the book, I read it.

I like travelling abroad. I never travelled to some countries like Spain, Italy and others but I've been to Bulgaria, France, United Kingdom, Greece and Turkey.
